

Brandon Dickey

Full-Stack Developer Open to relocation

Saint Paul, MN · brandondickey7@gmail.com · +1 952 334 0920

Full-stack developer with an Associate's degree in Computer Programming and a portfolio of shipped projects — a live client website, a full-stack app with its own Python API, and a cofounded blockchain-infrastructure startup. Looking for a first full-time software engineering role.

SKILLS

Languages	JavaScript · TypeScript · Python · Java · SQL · Bash · HTML5 · CSS
Frameworks & Libraries	React · Next.js · FastAPI · Node.js
Databases	SQLite · MySQL · Microsoft SQL Server · Relational design
Cloud & DevOps	Linux (Ubuntu) · Hetzner · OVHcloud · Linode · Docker · Git & GitHub
Practices	REST APIs · Responsive design · Accessibility · Testing & debugging

PROJECTS

Omniscape — Content-Curation Platform • Live Next.js · React · TypeScript · Supabase · Redis · Remotion

- Live B2B platform that lets artist-management teams and marketing agencies run multiple artists' fan pages at scale (my role detailed under Experience).

Flipper — Resale Intelligence • In progress Next.js · React · TypeScript · Python · FastAPI · SQLite

- Built a full-stack app that aggregates marketplace listings and flags undervalued deals — end-to-end ownership of data model, API, and UI.
- Designed a FastAPI + SQLite back-end that ingests and scores listings; built the React/Next.js front-end with a catalog, deal alerts, and inventory tracker.

Juliann Miller — Therapy Practice Website • Live HTML · CSS · Responsive design · Accessibility

- Designed and shipped a complete, accessible marketing website for a real paying client — live today, with WCAG-conscious contrast, semantic structure, and fast loads.

GAV Records — Guidance and Voices • Live Next.js · React · TypeScript · Tailwind CSS

- Contributed to building and maintaining a live, user-facing website alongside the team.

BuyerEdge — Buyer Confidence Tool • In progress React · TypeScript · API integration

- Contributed React/TypeScript features to an existing, evolving codebase alongside a small team.

Market Automation Bots • In progress Python · Third-party APIs · Scheduling

- Self-directed bots that pull live market data, evaluate it against rules, and act on a schedule.

EXPERIENCE

Software Developer · Omniscape — B2B content-curation platform Remote · Present

- One of two developers on a live B2B platform (Next.js · Supabase · Redis · Remotion) that lets artist-management teams and marketing agencies run multiple artists' fan pages at scale.
- Test infrastructure and propose new solutions and implementations that drive user experience and customer support for institutional clients.

Cofounder — Web Developer & Company Frontman · BlokCrafters United States · Apr 2019 – May 2025

- Cofounded a blockchain company — a full dev team that built apps and ran secure infrastructure for part of a blockchain network — operating one of the fastest block producers (sub-31ms, failsafe hardware on Ubuntu/Hetzner/OVHcloud/Linode; Bash + Python).
- Built and maintained the company's website and web presence.
- Served as a company frontman — community engagement and customer support — collaborating with a distributed team via Git & GitHub.

Certified Pawn Broker & Sales Associate · Max It Pawn / Pawn America Twin Cities, MN · May 2024 – Present

- Appraise and price jewelry, electronics, and collectibles using market research and sales data, while maintaining compliance, accurate records, and cash handling.

EDUCATION

Associate in Applied Science — Computer Programming

Saint Paul College · Saint Paul, MN · 2018 – 2021
